

QSB5.9 Features

- EPA Tier 2, IMO and RCD certified
- SmartCraft™ enabled
- Gallery cooled pistons for long life
- Common rail fuel system
- Easily accessed filters and maintenance items
- Corrosion-proof belt guard
- 24 valve cylinder head for better breathing and acceleration
- Strengthened block for long life and reduced noise

Extended Range

The QSB5.9 offers excellent fuel economy and cruise power. Boats accelerate quickly from the combination of a perfectly matched turbocharger and a new 24 valve cylinder head, which allows the engine to breathe more efficiently.

Quiet Strength

An 80% reduction in noise at idle is one of the many benefits from the common rail fuel injection system and design modifications to the cylinder block. The cast iron block is scalloped, which further reduces noise by increasing the stiffness of the engine. Peak torque on the QSB5.9-380 increases nearly 20% without wastegating. Combined, these innovations make for a strong and highly reliable power system.

SPECIFICATIONS

	QSB5.9
Displacement litres (cu. in.)	5.9 (359)
Cylinders	Inline-6
Fuel System	Common Rail
Water in Fuel Sensors	Required
Marine Gear Sensors	Optional
Cabin Heat / Block Heat	Optional
Exhaust Risers	Optional
Closed Crankcase Ventilation	Optional
Volts / Amps / Isolated	12 or 24 Volt / 70-160 Amp / Optional
Corrosion Protection (drive and engine)	Zincs / E-coating / New polymer belt guard / Two-part epoxy paint process
Air - handling	Turbocharged / Aftercooled

QSB5.9 Litre 230-425 mhp

Cummins MerCruiser Diesel

RELIABILITY THROUGH INNOVATION

Trusted by Recreational Boaters Worldwide

Cummins MerCruiser Diesel is focused on bringing a greater level of enjoyment, efficiency and reliability to the recreational boater. From a day cruise with your family to a season-long excursion to sportfishing in the islands, our products are built for maximum strength, performance and safety.

Through incredible advances in diesel technology, CMD has brought a wider range of recreational boaters the freedom to cruise farther, to experience a quieter, smoother ride, to virtually eliminate smoke and fumes, and experience a level of acceleration and power never before realized in diesel propulsion.

Our innovative Quantum diesel engines, some of the cleanest and most efficient compact diesel engines to ever hit the water, combined with our advanced drives, electronic control systems, SmartCraft™ vessel integration and worldwide service network, make it clear that CMD is the premiere prop-to-helm solution.

Regardless of the type of boating you enjoy, CMD has developed an engine package to meet your needs. From runabouts to trawlers, high-performance yachts to tournament sportfishers, in marinas all across the globe, recreational boaters trust the combined power of Cummins Incorporated and Mercury Marine to consistently deliver innovative and reliable diesel propulsion systems.
